

FIM SABER 1635-RS

FIM SABER 1635-RS 10-Way Pull-Type Grader

Adjustable Rear-Steer Multi-Use Implement

The FIM Saber 1635-RS 10-way Pull-Type Rear-Steer Grader can save you time and money by completing a variety of jobs using a single, adjustable, multi-use implement. With a tilting/swinging blade, vertical adjustment, rear steering and tilt angle, there are no limits to what you can accomplish.

The FIM Saber 1635-RS is an easy-to-use tool whose overall length, rear steering and tilting blade allow for better control of rear sideways movement. Each unit includes folding blade sides to transform the blade into a powerful box blade. The FIM Saber 1635-RS is a stunning combination of land-plane, box blade, maintainer and dirt scraper whose versatility is an asset for any operation.

The FIM Saber 1635-RS features dual hydraulic cylinders to control blade angle, one cylinder each controlling moldboard tippage and blade tilt, an easy-to-read tilt gauge, replaceable high-carbon steel shins and bottom blades, a safety lock for the top cylinder and folding box blade end caps. The FIM Saber 1635-RS comes ready-to-use with all hardware and hydraulics included.
